Lilly's Joyful Spirit

A Tribute Song

Intro - acoustic guitar, ukulele

Verse 1

Little white puffball, a shadow so true,
From the very first moment, my heart followed you.
Your bright Eskie eyes always fixed on my face,
You claimed your own spot, a most precious space.
On the soft couch beside me, a comforting sight,
Snuggled close, day and night, pure delight.
My loyal companion, always near,
Chasing away every doubt, every fear.

Chorus

Oh, Lilly, dear Lilly, a joy in my soul,
Fifteen and a half years made my world whole.
Every wag of your tail, a song in the air,
A beautiful lifetime beyond all compare.

Verse 2

Through morning's first light and the afternoon's glow,
My stay-at-home days watched our sweet friendship grow.
You were there for each moment, from sunrise to dark,
Leaving paw prints of love, a beautiful mark.
Every cuddle a treasure, a silent embrace,
Filling my home with your warmth and your grace.
A constant reminder of simple, true bliss,
Forever I'll cherish each memory, each kiss.

Chorus

Oh, Lilly, dear Lilly, a joy in my soul,
Fifteen and a half years made my world whole.

Lilly's Joyful Spirit (continued)

Every wag of your tail, a song in the air,
A beautiful lifetime beyond all compare.

Bridge

And though you have journeyed, beyond what I see,
I feel your sweet spirit, still watching over me.
When my time finally comes, my one fervent plea,
Run fast, my sweet Lilly, straight into my arms, to me.
And bring Bella and Missie, so we're all reunited and free.

Instrumental - ukulele, glockenspiel

Final Chorus

Oh, Lilly, dear Lilly, a joy in my soul,
Fifteen and a half years made my world whole.
Every wag of your tail, a song in the air,
A beautiful lifetime beyond all compare.
You filled every moment with laughter and light,
Forever my star, shining ever so bright.

Outro

You're running free now, on skies bright and blue,
My guardian angel, I know it is true.
Still watching me closely, from wherever you roam,
My sweet Lilly, forever, you'll be coming home.

Outro - acoustic guitar fade
