

Remembering Ollie

Custom Pet Memorial Songs

Missy's Endless Shore

A Tribute Song

Intro - piano, strings

Verse 1

A tiny face, a watchful gaze
From the living room window through all the days
A sweet little Shih Tzu, with fur so bright
Bringing our home such a gentle light
You'd sit on your cushion, so safe and sound
Watching the world spinning around
A quiet observer, always aware
A sweet little shadow beyond compare

Chorus

Oh, Missy, my love, across eleven years
You filled all our moments, calming all fears
A bond woven deeply, a love true and vast
My sweet baby girl, a love that will last
Every paw print etched deep in my soul
Making my broken heart wonderfully whole

Verse 2

No matter the weather, sun, wind, or rain
You'd sit by my side, through joy and through pain
With me in the garden, a loyal friend true
My heart felt so full, just being with you
Through heat of the summer, or winter's soft snow
Your presence beside me made my spirit glow
Always so ready, a faithful embrace
My happiest memories, held in this place

Chorus

Missy's Endless Shore (continued)

Oh, Missy, my love, across eleven years
You filled all our moments, calming all fears
A bond woven deeply, a love true and vast
My sweet baby girl, a love that will last
Every paw print etched deep in my soul
Making my broken heart wonderfully whole

Bridge

I whisper your name, though you're just out of sight
"I miss you, baby girl," with all of my might
"And Momma loves you," forever it's true
My heart holds a space, only for you

Instrumental - strings, acoustic guitar

Final Chorus

Oh, Missy, my love, across eleven years
You filled all our moments, calming all fears
A bond woven deeply, a love true and vast
My sweet baby girl, a love that will last
Every paw print etched deep in my soul
Making my broken heart wonderfully whole

Outro

Now on a bright shore, where soft waves do gleam
You're fetching your squeaky toy, living a dream
From water so clear, to sand warm and free
Forever running happy, waiting for me

Outro - cello fade

Forever in our hearts
