Custom Pet Memorial Songs

Dominic Diesel's Happy Dance

A Tribute Song

Intro - acoustic guitar, ukulele

Verse 1

The door would open, the day would unwind
A happy puppy dance, one of a kind
Your Pittie spirit, so strong and so true
Each time we came home, we ran right to you
A wagging tail blur, a joyful embrace
Smiling wide, with love in your face
Our gentle giant, a furry delight
Making every day feel so bright

Chorus

Oh, Dominic Diesel, our hearts remember
Five years of pure love, from spring to December
You filled our lives with a joyous refrain
We'll celebrate the sunshine, and ease the soft pain
Our best good boy, our loyal, sweet friend
A love like yours will never truly end

Verse 2

Walking in the door, after a long day
You'd jump on my lap, and there you would stay
No getting up then, just snuggles and sighs
Lost in your deep, adoring eyes
A comforting weight, a presence so near
Banishing worries, chasing all fear
Your quirky sweet ways, a treasure to see
Forever you'll live inside of me

Chorus

Dominic Diesel's Happy Dance (continued)

Oh, Dominic Diesel, our hearts remember
Five years of pure love, from spring to December
You filled our lives with a joyous refrain
We'll celebrate the sunshine, and ease the soft pain
Our best good boy, our loyal, sweet friend
A love like yours will never truly end

Bridge

Though tears may still fall, our spirits take flight
Recalling the joy, the pure, guiding light
You taught us so much, a bond strong and deep
"You're our best good boy, we love you so much, chief chief!"

Ukulele Solo

Final Chorus

Oh, Dominic Diesel, our hearts remember
Five years of pure love, from spring to December
You filled our lives with a joyous refrain
We'll celebrate the sunshine, and ease the soft pain
Our best good boy, our loyal, sweet friend
A love like yours will never truly end

Outro

Now on your turn, in the sidewalk you wait
A peaceful slumber, defying all fate
Our sweet Dominic, forever serene
The happiest memories, forever unseen

Outro - guitar fade

Forever in our hearts
