Tru's Gentle Light

A Tribute Song

Intro - piano, strings

Verse 1

A little white cloud, so small and so bright,
You walked into our lives, a pure, gentle light.
With fur like soft snow and a heart full of grace,
The sweetest expression upon your dear face.
My first memory, so clear and so true,
Was gazing deep into those big black eyes of you.
They sparkled with wonder, a beautiful sight,
Filling our world with such tender delight.

Chorus

Oh, Tru, dear Tru, our sweet angel from above,
Five cherished years filled with endless love.
A bond we created, so precious and deep,
Secrets and solace we lovingly keep.

Verse 2

As evening would fall, the day drawing to close,
Our special time started, as everyone knows.
You'd hop on the bed, with a soft little sigh,
Beneath the warm covers, you'd peacefully lie.
Your head on my pillow, a comforting weight,
Sharing sweet silence, escaping all fate.
Just quiet soft breathing, a peaceful embrace,
A moment of heaven, in our sacred space.

Chorus

Oh, Tru, dear Tru, our sweet angel from above,
Five cherished years filled with endless love.

Tru's Gentle Light (continued)

A bond we created, so precious and deep,
Secrets and solace we lovingly keep.

Bridge

Though silence now echoes, where once you would be,
Your spirit still whispers, forever with me.
"Ma ma loves you with all her heart," I would say,
And that love remains strong, lighting up every day.
A promise remembered, etched deep in my soul,
Making my broken heart feel wondrously whole.

Instrumental - piano, strings

Final Chorus

Oh, Tru, dear Tru, our sweet angel from above,
Five cherished years filled with endless love.
A bond we created, so precious and deep,
Secrets and solace we lovingly keep.

Outro

Now I picture you resting, bathed in soft light,
On a sun-warmed chair, shining ever so bright.
Peacefully sleeping, without a care,
A beautiful vision, beyond all compare.
My sweet Tru, my dear Tru, forever you'll stay,
In the warmth of my heart, till my very last day.

Outro - piano fade

Forever in our hearts
