

Remembering Ollie

Custom Pet Memorial Songs

Charlie and Gidget's Rainbow Run

A Tribute Song

Intro - ukulele, acoustic guitar

Verse 1

I remember the day you came, so tiny and so new
With hearts so full of playful flame, in everything you'd chew
Two little Yorkie Poos, so sweet, with love in every glance
You'd dance around on tiny feet, given every single chance.

Chorus

Oh Charlie and Gidget, my sweet pair, sixteen years by my side
A love beyond compare, with nowhere left to hide
Your playful spirit, bright and free, a joy that still remains
You'll always be a part of me, through sunshine and through rains.

Verse 2

From morning's light to sleepy night, each moment felt so grand
Holding you close, a pure delight, a paw held in my hand
Our bond of love, a tender vow, a feeling deep and true
There was no better time than now, when I was there with you.

Chorus

Oh Charlie and Gidget, my sweet pair, sixteen years by my side
A love beyond compare, with nowhere left to hide
Your playful spirit, bright and free, a joy that still remains
You'll always be a part of me, through sunshine and through rains.

Bridge

You're my buddies, my pals, my friends, it will be this way till the end
My love for you truly transcends, a bond that time can't bend.
I want you to know that I love you so, I know we'll be together again.

Charlie and Gidget's Rainbow Run (continued)

I'll wait for you, or you for me, forever, wild and free.

Instrumental - ukulele, piano

Final Chorus

Oh Charlie and Gidget, my sweet pair, sixteen years by my side
A love beyond compare, with nowhere left to hide
Your playful spirit, bright and free, a joy that still remains
You'll always be a part of me, through sunshine and through rains.

Outro

Now at the Rainbow Bridge you roam, strong and healthy, side by side
Healed and waiting for me home, with no more place to hide.
The Lord will send you first, I know, to greet me at the gate
That unconditional love you show, is worth the long, long wait.

Outro - acoustic guitar fade

Forever in our hearts
