Carlirose's Golden Field

A Tribute Song

Intro - acoustic guitar, light drums

Verse 1

The first light of morning, a soft, wet nose near,
A gentle reminder that you were right here.
You'd jump in the lake, so brave and so true,
Convinced that you had to come rescue me too.
Your big comfy bed, a place warm and grand,
You shared it so kindly with Bubbles in hand.
A German Shepherd heart, loyal and bold,
A story of friendship, more precious than gold.

Chorus

Oh, Carlirose, my dear Carlirose,
Fourteen and a half years, how love always grows.
Through sun and through storm, by my side you would stay,
You brightened my world in your own special way.

Verse 2

I picture you now, in fields running free,
Pure joy in your stride, for the whole world to see.
On the deck at Discovery Bay, you'd relax by my side,
Content in your kingdom, with nothing to hide.
Each step that I took, you were always right there,
A shadow of comfort, beyond all compare.
Your spirit was vibrant, your presence so keen,
The best companion I'd ever have seen.

Chorus

Oh, Carlirose, my dear Carlirose,
Fourteen and a half years, how love always grows.

Carlrose's Golden Field (continued)

Through sun and through storm, by my side you would stay,
You brightened my world in your own special way.

Bridge

My whispered farewell, as you took to the sky,
"Run fast, run free, my love, don't you cry."
"Know how very much you were loved, it is true,"
"And how proud you made me, in all that you do."

Instrumental - piano, acoustic guitar

Final Chorus

Oh, Carlrose, my dear Carlrose,
Fourteen and a half years, how love always grows.
Through sun and through storm, by my side you would stay,
You brightened my world in your own special way.

Outro

Now running through tall grass, where green meadows gleam,
Protecting the little ones, a peaceful, sweet dream.
No more pain can touch you, you're vibrant and bright,
Watching from Rainbow Bridge, a guiding star's light.
Rest easy, my sweet girl, forever at peace,
Your beautiful memory will never decrease.

Outro - guitar fade
